

## Product card

Temporary Plastic Gutter

index	6200
-------	------

### 1. Application

For temporary drainage of rainwater from roofs and scaffolding.

### 2. Technical Data

- Length: 20 m
- Material: LDPE
- Width: 30 cm

### 3. Risk Analysis

- Foil tearing: Excessive load may cause damage.
- Incorrect installation: May result in inefficient water drainage.
- Slippery surface: Wet foil may pose a slipping hazard.
- UV degradation: Prolonged sun exposure may weaken the material.

### 4. Safety Guidelines

- Install according to the instructions, ensuring proper slope.
- Avoid excessive loading of the foil.
- Regularly inspect the material condition during use.
- Do not use as a permanent drainage system component.
- Avoid prolonged exposure to strong UV radiation.

### 5. Storage Conditions

Store in a cool, dry place, away from direct sunlight.
